Summary

Target is low and structure. Land is rough and bumpy w/ lots of green ~~leafy~~ leafy, scaly, prickly elements. Structure is dense, rough, abraded - dark earth tones dominate some of rough masonry or rocky. ~~Structure~~ seems to be more than one structure. At least two - the seems to be somewhat rounded and imperfectly domed in shape. w/ projections along the outside edges. The one tall, towering impressive in gestalt and are partially squarish in cross section. AOhimensions suggested a lush vegetative setting w/ dense structure reminiscent of something like Angkor Wat. END 14:28
