Target seems to be land with structures
bridge, sandy, porous, bumpy, grainy, pitted
uneven, solid, light, reflective, indented,
blatant, creased. Feels there is a boundary
also feels rounded, something is soft, seems
dry, wide, open, centered, smoother, forming
& black. A structure may be massive,
wide, perpendicular, straight, lifted or
elevated, crooked & flat, also concave
& edged. The target location seems quiet

~~History~~

rising & contains; connected, joined, pieces,
ridged, riveted, sided. Something is mutative
hinged, pivoting / turning, supported. The
sound of something creaking or rubbing.
Seems there is an entrance, box, eg,
masonry, wide & cornered. Something
about the target seems intermittent,
rolling, moving, dropping, bubbling, bluish,
pointy. Feels foreign, fluid, chemical,
some sort of sound or communication
possibly between ~~to~~^{two} points.

I felt nervous during the session
however it seemed as though I got
on signal line 1/2 way there & I feel
as if I did average. 5/10
