Summary

The target is Hard metallic Flat angled
 It has an element of a dip or depression and
 Some element is a dappled surface. There is a
 expansive surrounding and a lengthy Flat
 extended surface. other misc. elements are
 Fanned ~~a cement~~ Boxey glassy. Color are
 Blue white tan dark. Some structure ~~or~~
~~or~~ or object is contained or enclosed.

Vertical repetition reminds me of windows.

I found it ^{an} interesting location.

Aols

all my aol's ~~can~~ made me feel ^{like} an open
 public space or exhibition where people
 stood to watch something like an ~~an~~ air-
 show ^{airplane} with a long cement air strip,
 scenic. But the target itself is ~~some~~
 some ~~small~~ object within this large scene

Post Session reflections

Session 11B

I felt strongly that I
I was too Big above the target describing
the greater area ^{and objects area} around it, and could not
pin point the specific target itself.
